## Red Valve<sup>®</sup>

## **PCV - Series 5200 Pneumatic Actuated Control Pinch Valve**

- High cycle life, repeatable control.
- Sleeve is the only component in contact with the media, eliminating the need for expensive alloy bodies.
  Versatile sleeve choices meet exact flow requirements.
- External stroke adjustment.
- · Bi-directional, drop-tight shutoff.

## Materials of Construction

• Body: Ductile iron

SERIES 5200

- **Sleeves:** Pure Gum Rubber, Ethylene Propylene Diene Terpolymer (EPDM)\*, Acrylonitrile-Butadiene (NBR), Fluoroelastomer (FKM)\*, Chloroprene (CR)\*, Chlorosulfonated Polyethylene (CSM), Chloro-Isobutylene-Isoprene (CIIR).
  - \* White food grade options available.
- Drilled and tapped flanges: ASME 150, ASME B16.1 125 cast flanges, AWWA C110 125 flanges, EN1092 PN 6, EN1092 PN 10, EN1092 PN 16, JIS 5K, JIS 10K. Other drill patterns available upon request.
- Actuators: Air to Open/Air to Close (ATO/ATC), Air to Open/Fail Close Spring (ATO/FCS), Air to Close/Fail Open to Spring (ATC/FOS).
- **Optional:** Extended stems and torque tubes, floorstands, control components.

Red Valve's Series 5200 Control Valve design offers maximum durability with precise control and virtually zero maintenance. The heavy-duty pinch mechanism positions the sleeve for accurate control over a wide flow range. The valve has no packing to maintain or seats to wear, and the elastomer sleeve is the only component in contact with the media, eliminating the need for expensive alloy bodies.

The 5200 D-Port, in sizes over 4", has a bottom pinch bar that is used to reduce the stroke length of the valve by pre-pinching the sleeve into a D-shaped port, providing more immediate response to control signal with no loss of flow capacity.

5200 Closing Action

Cone Sleeves can be specified to further enhance control performance and match the exact Cv level desired. True feedback positioning is accomplished through the direct linkage of the pneumatic positioner to the valve stem shaft. There is no splitting of the positioner output. The benefits of true feedback positioning on Red Valve's Series 5200 Valves are accurate small-change response signals to the positioner, causing similar changes in true valve position, greatly enhancing control accuracy.
